

## PRODUCT SPECIFICATION

### Abalone Powder

1	<b>Name</b>	Abalone Powder
2	<b>Code</b>	ABAFPO2.0
3	<b>Form</b>	Powder
4	<b>Description</b>	A free flowing dark green powder with a characteristic abalone odour.
5	<b>Container</b>	The powder is heat sealed into foil bags which are contained within high strength cardboard cartons. The net weight of each unit is 15 kilograms.
6	<b>Label</b>	The 15 kilogram boxes have labels placed on top of carton, as well as an address label. These labels will comply with NZFSA requirements, so will include details such as the batch number, species name, product name, expiry etc.
7	<b>Packaging</b>	The powder is packed into a foil pouch within a high strength cardboard carton. Cartons are glued and sealed top & bottom.  Cartons are shrink wrapped onto wooden pallets, and stacked to a maximum height of 1.7m overall.  A single domestic address label is adhered to the shrink wrapping of each pallet at dispatch.
8	<b>Ingredients</b>	100% freeze dried Abalone powder ( <i>Haliotis iris</i> ). There are no additives, and only water is removed in the drying process.
9	<b>Microbiology</b>	Total aerobic plate count $\leq 5 \times 10^4$ cfu/g <sup>1</sup> Faecal Coliforms $\leq 10$ cfu/g <sup>1</sup> <i>Staphylococcus aureus</i> $< 10^2$ cfu/g <sup>1</sup>
10	<b>Analysis</b>	Loss on drying $< 4\%$
11	<b>Shelf Life</b>	Two years from the date of manufacture, subject to suitable storage conditions being maintained. The powder will absorb moisture when exposed to the atmosphere. Unused bags should be resealed.
12	<b>Other/ Miscellaneous</b>	

<sup>1</sup> Colony forming units per gram
