

NUTRIZEAL LTD PRODUCT DATA SHEET

Product: Manuka Honey Powder
Code: HMAFPO3.0

Description	A free flowing pale, straw coloured powder containing characteristics typical of New Zealand Manuka honey.
Production	Manuka Honey Powder is produced by freeze drying liquid Manuka honey with maltodextrin at low temperatures in a vacuum.
Packaging	10kg in a heat sealed foil bag placed inside a cardboard carton. Other packaging options may be available upon customer request.
Application	This free flowing powder can be added dry to most formulations, and is also dispersible and soluble in water >30°C.
Storage	Store sealed bags in cartons in a cool dry place away from light and humidity.
Shelf life	18 months from production date when stored under specified conditions.
